#### Hi Elaine,

Thanks for your request. We'll obtain this article via interlibrary loan / document delivery and forward it as a PDF if it arrives in that format, as we don't have access to this particular journal.

Wires, Linda A., and Francesca J. Cuthbert; "Historic Populations of the Double-crested Cormorant (Phalacrocorax auritus): Implications for Conservation and Management in the 21st Century" Waterbirds 29(1): 9-37, 2006

Subject: RE: any book or journal suggestions?

Liz,

I am trying to find:

Wires, Linda A., and Francesca J. Cuthbert; "Historic Populations of the Double-crested Cormorant (Phalacrocorax auritus): Implications for Conservation and Management in the 21<sup>st</sup> Century" Waterbirds 29(1):

Thank you for your help with this!!

Elaine,	
Go to the journal site (thru national Desktop Library per the links in my original email, or directly to Conservation Biology) and look at the left side of the page (Journal tools, screenshot below):	
Click "Get New content Alerts" and provide your email address. Alerts will be sent to you.

Hi Elaine,

Thanks for the feedback. We are continuing the two listed below.

As for "Journal of conservation biology," did you mean "Conservation Biology"? If yes, this is a nationwide EPA desktop library subscription:

http://intranet.epa.gov/desktop/journalsebooks.html

If not, let me know the publisher or some other info. to help me find it.

Questions, comments? Let me know.

Liz Doyle, MILS

Hi. Liz.

Just a request to please continue our subscriptions to High Country News, Yes Magazine, and consider subscribing to Journal of Conservation Biology. I think we discontinued CB a while ago because it was expensive, but maybe there is a less costly way to obtain it regularly, e.g., online?

Thanks so much!

Elaine Somers

**Subject:** any book or journal suggestions?

Hello ETPA staff.

Region 10 library will need to spend a good portion of our annual allocation in a fairly short time frame (this week). We want to ensure that agency funds are spent on what is needed by staff, so I thought I'd ask you all for suggestions. This is your opportunity to let us know what you'd like to see added or subscribed to. We'll do our best to accommodate your requests.

Any **journal** or **serial** titles you'd like to see us have access to?

Any reports or books you'd like to purchase?

Any reference titles you'd like to see added?

Any database subscriptions?

Let me know! Thanks for your time and attention.

See links below to determine if we already have access to a resource.

Conservation Biology in the News

## Find Conservation Biology in the News

Conservation Biology is constantly covered in the media, including:

Trap by the High Economic Value of the Maine Lobster Fishery" Discovery News covers "Effects of

Introducing Threatened Falcons into Vineyards

New York Times covers "Creation of a Gilded

Damage to Grapes" The Independent covers "Scientists' Opinions on the Global Status and Management of

on Abundance of Passeriformes and Bird

Psychology Today covers "Carnivorelivestock conflicts: Effects of subsidized predator control and economic correlates on

Biological Diversity"

the sheep industry"

Mongabay covers "A matrix-calibrated species -area model for predicting biodiversity losses due to land-use change"

Science News covers "Effects of management of domestic dogs and recreation on carnivores in protected areas in Northern California"

Wired News covers "The potential

Southern Fried Science covers "Ecosystem services as a common language for coastal ecosystem-based management" and "Obscuring ecosystem function with application of the ecosystem services concept"

conservation value of non-native species"

New Virtual Issue | Read

National Marine Fisheries Service

The discipline of conservation biology

developed from a strong evolutionary and ecological foundation. Viability of populations and species can depend as much on genetic factors such as inbreeding and gene flow as on demographic factors such as population growth rate and distribution. This compilation captures both familiar themes such as bottlenecks, inbreeding depression, hybridization, captive breeding, and population subdivision and more specialized topics such as genetic restoration, invasive species, reintroductions, fragmentation, mutational meltdown, and forensics. In the next 5 years, we can expect to see a qualitative breakthrough as tools from the rapidly evolving genomics revolution are increasingly applied to real-world problems in conservation and management. Read the conservation genetics virtual issue today.
